Education

Indian Institute of Information Technology, Una 2023 – Present
B.Tech in Information Technology

Experience

Full Stack Developer Intern (MERN) — Modelsuite.ai Internship Letter
React, Node.js, Express.js, MongoDB

- Worked as one of the core engineers on a workforce management platform used to run day-to-day operations for 100+ employees, building the interface in React on top of Node.js, Express and MongoDB APIs.
- Owned the meeting management module, letting employees schedule meetings, invite colleagues and track responses in one place.
- Built the announcements, task management and leave management modules, so managers can assign work, approve leave and reach the company from a single dashboard.
- Merged 50+ pull requests in three months inside a 25-engineer Agile team, covering feature work, code reviews, and production bug fixes.

Projects

DevGrams – Developer Networking Platform Live: devgrams.in | GitHub
React, Node.js, Express, MongoDB, WebSockets, AWS EC2

- Built a networking platform where developers create profiles, send connection requests and chat with each other in real time once both sides accept.
- Secured the app with JWT-based login so a user can only open their own connections and messages, and added automated emails plus a daily reminder job for pending requests.
- Integrated Razorpay so users can pay for premium membership, and deployed the whole application on an AWS EC2 server behind an Nginx reverse proxy with PM2 keeping the service alive.

AgroConnect – Wholesale Crop Trading Platform GitHub
React, Node.js, Express, MongoDB, Socket.io, Gemini API

- Built a full-stack wholesale crop trading platform with separate farmer and buyer portals using React, Node.js, Express, and MongoDB, letting farmers list produce and buyers place bulk orders directly.
- Implemented real-time stock updates with Socket.io and MongoDB Change Streams, cart management with min/max order quantity constraints, and JWT-based authentication with email verification for both user roles.
- Integrated Google Gemini AI (CropSense) to predict suitable crops from soil type, altitude, temperature, humidity, and rainfall, and added Leaflet map integration for location-based product and delivery tracking.

StackAssist AI – RAG-Based Developer Knowledge Assistant GitHub | Live
LangChain, FAISS, BM25, Google Gemini, Streamlit Feb 2026 – Present

- Designed a RAG pipeline using LangChain, FAISS, and Google Gemini to answer developer queries on PostgreSQL, FastAPI, and AWS from a local knowledge base.
- Implemented hybrid retrieval combining FAISS semantic search and BM25 keyword search, with conversation memory and multi-turn query rewriting.
- Integrated DuckDuckGo web search fallback and deployed a Streamlit app with Concise/Detailed modes and latency tracking.

Technical Skills

Languages: JavaScript, Python, C++, C, SQL, HTML, CSS
Frontend: React.js, Tailwind CSS, Bootstrap, Responsive UI
Backend & Databases: Node.js, Express.js, FastAPI, REST APIs, MongoDB, PostgreSQL, Redis
Cloud & Tools: AWS EC2, Docker, Nginx, Git, GitHub, Firebase, Postman
Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, LLM/Gen AI

Achievements

- LeetCode Knight (1850+ rating); 2-star rated on CodeChef.
- Solved 500+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- **Semi-finalist, Flipkart GRiD 8.0:** Qualified for the semi-final stage of one of India's premier national-level software engineering competitions.
- **1st Runner-Up – Run Code Run:** Placed 2nd out of 50 teams, building and demoing a working prototype within the contest window.

Positions of Responsibility

- **Football Council Head, Zenith Sports Club:** Captain of the college football team; run selections, practice schedules and inter-college fixtures for a 20+ player squad. (2026 – Present)
- **Technical Head, EPMOC:** Plan and run college-level events end to end, from logistics and vendors to day-of execution. (2026 – Present)
